

MUHAMMAD WAQAR

Full-Stack Developer — Next.js Developer — MERN Stack Developer

📍 Sahiwal, Punjab, Pakistan 📞 +92-320-691-3949 ✉ waqar.softwaredev@gmail.com 🌐 [Portfolio](#) [LinkedIn](#) [GitHub](#)

Summary

Mid-Level Full-Stack Developer and MERN Stack Developer with hands-on experience building production-ready applications using the MERN Stack, Next.js (App Router), TypeScript, and REST APIs. Proven track record in database performance tuning, secure authentication, and building responsive server-side rendered frontends. Experienced across healthcare, hospitality, and real estate domains in remote and collaborative team environments.

Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: Next.js (App Router, SSR, Server Components), React.js, Tailwind CSS, shadcn/ui

Backend & Database: Node.js, Express.js, MongoDB, Mongoose ODM, Firebase, REST APIs

Security & Cloud: NextAuth.js, JWT, RBAC, Zod Validation, AWS S3, Vercel

Developer Tools: Git, GitHub, ESLint, npm, VS Code

Experience

Full-Stack Developer

July 2025 – Present

Luminous Tech Solutions (Remote)

Next.js, Node.js, MongoDB, AWS S3, Firebase, Tailwind CSS

- Restructured and streamlined MongoDB database schemas for a high-traffic platform managing over **50,000 active user records**, reducing query latency by **25%** through strategic indexing.
- Built dynamic, responsive user interfaces with Tailwind CSS and shadcn/ui, **improving Lighthouse performance scores by 35%** across production builds.
- Developed secure role-based access control (RBAC) dashboards for administrators, donors, and consumers, enforcing strict data isolation with fully integrated REST API endpoints.
- Collaborated with three developers to integrate AWS S3 and Firebase cloud storage, automating media upload workflows and optimizing asset delivery pipelines.

Projects

Luminous Restaurant Management Platform | *Next.js, Node.js, MongoDB, Tailwind CSS, JWT*

Nov 2025 – Mar 2026

- Built a full-stack restaurant ordering system with real-time state management, secure payment handling, and role-based user authentication using JWT and NextAuth.js.
- Planned and implemented an efficient MongoDB schema to manage dynamic menus, tracking over 50 inventory items and synchronizing real-time order states across user roles.
- Developed a comprehensive admin dashboard featuring sales analytics, item availability controls, and a live order processing pipeline.
- Implemented responsive UI components with Tailwind CSS and Lucide Icons, improving rendering performance and user conversion rates across all device sizes.

Blood Logistics & Donation Platform | *React.js, Express.js, MongoDB, Tailwind CSS, JWT*

Dec 2025 – Apr 2026

- Delivered a role-based healthcare platform with dedicated dashboards for system administrators, blood donors, and hospital receivers, enforcing strict data isolation per role.
- Created secure REST APIs using Express.js to handle donor eligibility checks, blood stock verification, and location-based request matching.
- Integrated JWT authentication with route-level middleware protection, securing the transmission of sensitive medical records and user status data.
- Deployed a real-time status update pipeline that **cut communication delay by 40%** between hospitals and active donors during urgent requests.

Education

Bachelor of Science in Information Technology (BSIT)

2021 – 2025

Government College Sahiwal, Punjab, Pakistan

CGPA: 3.50 / 4.00
